# METRO WATER IS SAFE TO DRINK

The Metro Manila Drinking Water Quality Monitoring Committee (MMDWQMC) in its January 16, 2014 meeting pronounced that the water supplied by Manila Water and Maynilad at the time of sampling fully complied with the 2007 Philippine National Standards for Drinking Water (PNSDW) based on the microbiological and physico-chemical examination done on water samples collected at strategically designated Regulatory Sampling Points in their respective distribution system in the month of December 2013. In addition, both Manila Water and Maynilad also met and even surpassed the minimum sampling frequency requirement of the 2007 PNSDW for both microbiological and physico-chemical quality.

*Water supplied by Manila Water and Maynilad in November 2013 is:*

- ✓ 100% Free from disease-causing coliforms
- ✓ 100% compliant with physical and chemical standards based on examination done on 561 samples taken from East Zone (Manila Water) and 819 samples from West Zone (Maynilad)

Based on the above findings, the Committee pronounced that drinking water in the Manila Water and Maynilad distribution system was of Sanitary Quality with adequate residual chlorine.

The committee further announced that out of 1,472 Water Refilling Stations monitored in Metro Manila for the month of December 2013, **only 1,469** passed the standards set by PNSDW. Consumers are advised to look for the monthly microbiological quality and semi-annual physico-chemical results POSTED in their 'suki' or 'selected' refilling stations to ensure that the water they buy is **SAFE and POTABLE**.

# TUBIG SA METRO MANILA LIGTAS INUMIN

Sa pagpupulong ng Metro Manila Drinking Water Quality Monitoring Committee (MMDWQMC) noong ika-16 ng Enero 2014, masusing nasuri at idinektarang ganap na sumusunod sa 2007 Philippine National Standards for Drinking Water (PNSDW) ang tubig na kinolekta mula sa supply ng Manila Water at Maynilad. Ang deklarasyon ay ayon sa ginagawang pagsusuring microbiological, pisikal at kemikal na aspeto ng tubig mula sa kaukulang sampling points sa kani-kaniyang water system nitong buwan ng Disyembre 2013. Bukod dito'y nalampasan din ng Manila Water at Maynilad ang takdang bilang ng mga samples para sa mga naturang aspeto.

*Ang tubig mula sa Manila Water and Maynilad sa buwan ng Disyembre 2013 ay:*

- ✓ walang coliform na maaring magdulot ng sakit
- ✓ ganap na sumusunod sa pamantayang pisikal at kemikal mula sa 561 samples galing sa area ng Manila Water at 819 samples mula sa area ng Maynilad

Ayon sa mga nasaad na pagsusuri, idineklara din ng MMDWQMC na ang tubig mula sa pasilidad ng Manila Water at Maynilad ay **LIGTAS** at **MALIMS** at may sapat na residual chlorine.

Idineklara din ng MMDWQMC na **tanging 1,469 sa 1,472 Water Refilling Stations** sa Metro Manila na sinuri sa buwan ng **Disyembre 2013** ang pumasa sa pamantayang itinakda ng **PNSDW**. Pinaaatahanan ang publiko na pataging harapin ang buwanang **microbiological quality** at **kalahating taunang physico-chemical results** na marapat na nakapaskil sa mga 'suki' o 'selected' refilling station para masiguradong ligtas at malinom ang tubig na kanilang binibili.
