METRO WATER IS SAFE TO DRINK

The Metro Manila Drinking Water Quality Monitoring Committee (MMDWQMC) in its February 14, 2013 meeting pronounced that the water supplied by **Manila Water** and **Maynilad** at the time of sampling fully complied with the 2007 Philippine National Standards for Drinking Water (PNSDW) based on the microbiological and physico-chemical examination done on water samples collected at strategically designated Regulatory Sampling Points in their respective distribution system in the month of January 2013. In addition, both Manila Water and Maynilad also met and even surpassed the minimum sampling frequency requirement of the 2007 PNSDW for both microbiological and physico-chemical quality.

Water supplied by Manila Water and Maynilad in January 2013 is:

- ✓ 100% Free from disease-causing coliforms
- ✓ 100% compliant with physical and chemical standards based on examination done on 558 samples taken from East Zone (Manila Water) and 823 samples from West Zone (Maynilad)

Based on the above findings, the Committee pronounced that drinking water in the Manila Water and Maynilad distribution system was of **Sanitary Quality** with adequate residual chlorine.

The committee further announced that out of 884 Water Refilling Stations monitored in Metro Manila for the month of January 2013, **only 866 passed** the standards set by PNSDW. Consumers are advised to look for the monthly microbiological quality and semi-annual physico-chemical results POSTED in their 'suki' or 'selected' refilling stations to ensure that the water they buy is **SAFE and POTABLE**.

METRO WATER IS YOUR CONCERN TOO!
