

METRO WATER IS SAFE TO DRINK

The Metro Manila Drinking Water Quality Monitoring Committee in its October 10, 2012 meeting pronounced that the water supplied by **Manila Water** and **Maynilad** at the time of sampling fully complied with the 2007 Philippine National Standards for Drinking Water based on the microbiological and physico-chemical examination done on water samples collected at strategically designated Regulatory Sampling Points in their respective distribution system in the month of September 2012. In addition, both Manila Water and Maynilad also met and even surpassed the minimum sampling frequency requirement of the 2007 PNSDW for both microbiological and physico-chemical quality.

Water supplied by Manila Water and Maynilad in September 2012 is:

- ✓ **100% Free from disease-causing coliforms**
- ✓ **100% compliant with physical and chemical standards based on examination done on 543 samples taken from East Zone (Manila Water) and 786 samples from West Zone (Maynilad)**

Based on the above findings, the Committee pronounced that drinking water in the MWSS distribution system was **Safe and of Sanitary Quality** with adequate residual chlorine.

The committee further announced that out of 2,015 Water Refilling Stations monitored in Metro Manila for the month of September 2012, **only 1,981 passed** the potability standards set by PNSDW. Consumers are advised to look for the MONTHLY microbiological quality results POSTED in their 'suki' or 'selected' refilling stations to ensure that the water they buy is SAFE and POTABLE.

Monitoring Committee (MMDWQMC)

TUBIG SA METRO MANILA LIGTAS INUMIN

Sa pagpupulong ng **Metro Manila Drinking Water Quality Monitoring Committee (MMDWQMC)** noong ika-10 ng Oktubre 2012, masusing nasuri at idineklarang ganap na sumusunod sa 2007 Philippine National Standards for Drinking Water (PNSDW) ang tubig na kinolekta mula sa suplay ng **Manila Water** at **Maynilad**. Ang deklarasyon ay ayon sa ginawang pagsusuring microbiological, pisikal at kemikal na aspeto ng tubig mula sa kaukulang sampling points sa kani-kanyang water system nitong buwan ng Agosto. Bukod dito, y nalampasan din ng Manila Water at Maynilad ang takdang bilang ng mga samples para sa mga naturang aspeto.

Ang tubig mula ng Manila Water at Maynilad sa buwan ng Setyembre 2012 ay:

- ✓ walang coliform na maaaring magdulot ng sakit
- ✓ ganap na sumusunod sa pamantayang pisikal at kemikal

mula sa 543 samples galing sa area ng Manila Water at 786 samples mula sa area ng Maynilad

Ayon sa mga naisaad na pagsusuri, idineklara din ng MMDWQMC na ang tubig mula sa pasilidad ng MWSS ay **LIGTAS** at **MALINIS** at may sapat na residual chlorine.

Idineklara din ng MMDWQMC na **tanging 1,981 sa 2,015 Water Refilling Stations** sa Metro Manila na sinuri sa buwan ng **Setyembre 2012** ang pumasa sa pamantayang itinakda ng **PNSDW**. Pinaaalalahanan ang publiko na palaging hanapin ang **buwanang microbiological quality** na marapat na nakapaskil sa mga 'suki' o 'selected' refilling station para masiguradong ligtas at maininom ang tubig na kanilang binibili.

MAGPAHALAGA AT IPAALAMI!
